SERVICES

- **New building projects:** CCC excels in Conventional, PEMB and Addition/Expansion projects.
- **Improvement projects:** Renovation and Retrofit – CCC has a Special Projects division to focus on client objectives.
- **Re-Roof and Repair:** CCC offers metal-over-metal re-roof and metal building re-skin options that can make your building look new and last up to 40 years. Installed with no down-time to your business.
- **BIM Technology:** Every project is developed using 3D virtual reality software. Allowing you to fully experience your building before construction begins.

DESIGN-BUILD CONSTRUCTION & REAL ESTATE DEVELOPEMENT SINCE 1979

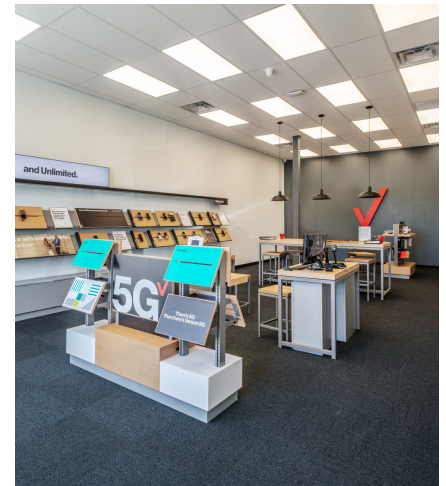

WHY CCC?

- Experience Matters.
- We have a 5-Star Google Review Rating.
- CCC excels at complex projects.
- Experience working in Operational Facilities.
- You will have Direct Line Access to Our Owners.
- Constant Communication with our Clients.
- 3D Virtual Reality Technology.

OUR PROCESS

- Centered on the Customer's goals.
- Creates a collaborative working environment between the Customer, Architect and Contractor.
- We work to ensure your project meets your budget expectations.
- We assume all risk for design errors, construction costs, and schedule.
- Our fixed price contract offers a certainty of outcome and cost control.
- Change orders are less frequent because the design is developed from the beginning with input from the Contactor and Architect.

BUTLER MANUFACTURING

- We are a Butler® Career Builder™ and your local single-source provider to the premier metal building system.
- Butler has been engineering and manufacturing state-of-the-art solutions for nearly every building type and component for close to 120 years.
- As a Career Builder™, CCC enjoys direct access to all of Butler Manufacturing® premier PEMB and conventional building systems, and a dedicated team of engineers who closely collaborate with us on every detail during the design of your building.
- Contact us today to learn why Butler's products are superior.
